

# Medichem: Your Trusted Partner in Pharmaceuticals

We are a European pharmaceutical company founded in 1972. We are specialized in the development and manufacture of APIs, HPAPIs and FDFs for the global generics industry and Chlorhexidine. We guarantee the highest standards, operational excellence and respect for the environment. With more than 50 years of history, we are focused on building strong relationships to continue being your business partner.

We have been  
**50 years**  
in Operations

Employees  
**+450**

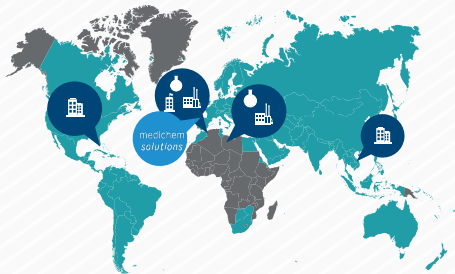

We are in  
**60+**  
countries

We have  
**600+**  
customers  
worldwide

We invest in R&D  
**10%**  
of our turnover

## A worldwide presence

We serve 600 customers worldwide, supplying more than 60 countries. Our continuous innovation and R&D investment guarantees a product adapted to the particularities of each country that meets all regulatory requirements.

MEDICHEM SOLUTIONS

Our three R&D centers in Spain and Malta, focusing on API and FDF, collaborate closely by sharing real-time information, thereby optimizing global testing and evaluation strategies.

## Added-value products

We work in pioneering added value products combined with innovative technology platforms

Our extensive portfolio that includes around

**45** APIs and **20** FDFs

covers a broad range of therapeutic areas.

In Medichem you will find not only a partner, but a leader in Chlorhexidine products too.

## Innovation drives us

We invest  
**10%**  
of the turnover  
in R&D and we  
have more than

**2** projects in  
R&D pipeline

We are at the forefront of innovation

## Quality First: Meeting Standards and Client Needs

We constantly work to meet all regulatory standards, but more importantly, our client's requirements

**17%**  
of our  
team works  
in R&D

**13%**  
of our  
team works  
in Quality

Also, we provide regulatory and quality support during the registration and development process.
